SUMMARY

Computer Science junior at IIIT Lucknow (CGPA: 8.80) with experience building AI agents and microservices at Sprinklr. Interested in distributed systems, LLM integrations, and full-stack development. Skilled in C++, Python, and JavaScript, with 1000+ competitive programming problems solved.

EDUCATION

- Indian Institute of Information Technology, Lucknow** Lucknow, Uttar Pradesh
 - Bachelor of Technology in Computer Science & Engineering; CGPA: 8.80* Jul 2023 – Present
- Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, Discrete Mathematics

EXPERIENCE

- Sprinklr** Gurugram, Haryana
 - Software Engineering Intern – Agentic AI & Platform Reliability* March 2026 – August 2026
 - Reduced mean-time-to-triage by **40%** and saved **10+ hrs/week** of manual debugging by building an AI-powered on-call agent integrating PagerDuty, Grafana, Kibana, and Graylog to process **500+ daily alerts**.
 - Automated end-to-end workflows from alert ingestion to structured Root Cause Analysis (RCA) generation, improving platform **observability and reliability** at scale across internal microservices.
 - Designed and deployed **Model Context Protocol (MCP) servers** in Python, establishing secure, low-latency bridges between LLM-driven agents and internal APIs, applying engineering best practices throughout.

PROJECTS

- CrowdInfra** [🔗](#) | [📄](#)
 - Next.js, Node.js, Express.js, MongoDB, Google Gemini API, Google Maps API*
 - Built a **community-driven infrastructure mapping platform** in a 24-hour hackathon; iterated rapidly on user requirements to prioritize features, earning **Runner-up** out of 100+ teams at Hack-O-Fiesta 2025.
 - Integrated the **Google Gemini API** to analyze local market competition, generating data-driven profitability insights faster than traditional manual market research.
 - Implemented geospatial filtering via the **Google Maps API** to surface hyperlocal demand signals with high accuracy and low latency.
- TravelPedia** [🔗](#) | [📄](#)
 - React.js, Spring Boot, MySQL, REST APIs, JWT Authentication*
 - Architected a secure, **full-stack travel planning application** using React.js, Spring Boot, and MySQL, supporting concurrent user sessions with robust JWT-based authentication and role-based access control (RBAC).
 - Developed a scalable RESTful API layer with **15+ endpoints** serving flights, hotels, and activities; integrated third-party APIs for real-time data aggregation, reducing total booking time by an estimated **30%**.

TECHNICAL SKILLS

- Programming Languages:** C++, Python, JavaScript, Java, C, SQL, HTML/CSS
- AI & Generative Systems:** LLM Tool Orchestration, MCP (Model Context Protocol), RAG, Prompt Engineering
- Backend & Databases:** Node.js, Express.js, Spring Boot, MongoDB, MySQL, PostgreSQL, REST APIs, Microservices
- Frontend Technologies:** React.js, Next.js, Tailwind CSS
- DevOps & Tools:** Git, GitHub, Docker, CI/CD

ACHIEVEMENTS

- Competitive Programming:** Specialist on Codeforces (**Max Rating: 1722**), Knight on LeetCode (**Rating: 1978**), 4-Star on CodeChef (**Rating: 1888**); solved **1000+ algorithmic problems** across platforms.
- Hack-O-Fiesta 2025 (IIIT Lucknow):** Secured **Runner-up** out of 100+ competing teams by developing CrowdInfra within a strict 24-hour sprint.

LEADERSHIP & EXTRACURRICULAR

- Coordinator, Utkrisht Fine Arts Society:** Managed end-to-end logistics, vendor relations, and on-site operations for cultural exhibitions attended by **500+ participants**.
- Corporate & PR Lead, Equinox (Annual Tech Fest):** Spearheaded corporate outreach and secured strategic sponsorships, meaningfully expanding the event's operational budget and reach.
