Summary

Computer Science undergraduate at IIIT Lucknow (CGPA: 8.80), graduating May 2027, with software engineering experience at Sprinklr building backend services, microservices, REST APIs, and AI-native workflows. Strong fundamentals in C++, Java, Python, JavaScript, Data Structures & Algorithms, Object-Oriented Programming, databases, and distributed systems. Experienced with LLM integration, MCP, tool calling, Docker, and CI/CD; solved **1000+ algorithmic problems**.

Education

- **Indian Institute of Information Technology, Lucknow** — Lucknow, Uttar Pradesh
  Bachelor of Technology in Computer Science & Engineering; ***CGPA: 8.80*** — *Jul 2023 – June 2027*
- **Relevant Coursework**: Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, Discrete Mathematics

Experience

- **Sprinklr** — Gurugram, Haryana
  Software Engineering Intern — *Mar 2026 – Sep 2026*
  - Engineered and deployed an AI-powered on-call agent integrating PagerDuty, Grafana, Kibana, and Graylog to process **500+ daily alerts**, reducing mean time to triage by **40%** and saving **10+ hours per week** in debugging.
  - Automated incident-response workflows spanning alert ingestion, investigation, tool execution, and structured root cause analysis (RCA), improving incident visibility across internal microservices.
  - Developed and deployed Python-based **Model Context Protocol (MCP) servers** connecting LLM-driven agents to internal APIs, enabling tool execution and automated operational workflows.

Projects

- **CrowdInfra** |
  Next.js, Node.js, Express.js, MongoDB, Google Gemini API, Google Maps API
  - Launched a community-driven infrastructure mapping platform enabling users to pin and upvote local infrastructure needs.
  - Implemented backend services and REST APIs using **Node.js, Express.js, and MongoDB** to support data persistence and communication between application components.
  - Integrated the **Google Gemini API** to analyze local market competition and generate data-driven profitability insights, with the **Google Maps API** supporting location-based demand mapping.
- **TravelPedia** |
  React.js, Spring Boot, MySQL, REST APIs, JWT Authentication
  - Delivered a full-stack travel planning application using React.js, Spring Boot, and MySQL, enabling users to search destinations, hotels, flights, and activities through a unified platform.
  - Implemented **JWT-based authentication and role-based access control (RBAC)** to secure user access and enforce authorization across backend resources.

Technical Skills

- **Programming Languages**: C++, Python, JavaScript, Java, C, SQL
- **Backend & Databases**: Node.js, Express.js, Spring Boot, FastAPI, REST APIs, Microservices, MongoDB, MySQL
- **AI & Agentic Systems**: LLM Integration, MCP (Model Context Protocol), Tool Calling, AI Agents
- **Data Science & Machine Learning**: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn
- **DevOps & Observability**: Docker, Git, GitHub, CI/CD, Grafana, Kibana, Graylog, PagerDuty
- **Frontend Technologies**: React.js, Next.js, Tailwind CSS, HTML/CSS

Achievements

- **Competitive Programming**: Expert on Codeforces (**Max Rating: 1722**), Knight on LeetCode (**Rating: 1978**), and 4-Star on CodeChef (**Rating: 1888**); solved **1000+ algorithmic problems** across platforms.
- **Hack-O-Fiesta 2025 (IIIT Lucknow)**: Secured **Runner-up** among **100+ teams** by developing CrowdInfra during a 24-hour hackathon.

Leadership & Extracurricular

- **Coordinator, Utkrisht Fine Arts Society**: Managed end-to-end logistics, vendor relations, and on-site operations for cultural exhibitions attended by **500+ participants**.
