Summary

Computer Science undergraduate at IIIT Lucknow (CGPA: 8.80), graduating May 2027, with software engineering experience at Sprinklr building and deploying backend services, microservices, REST APIs, and production systems. Experienced in C++, Java, Python, JavaScript, Spring Boot, Node.js, Docker, CI/CD, authentication, and system reliability. Built production systems processing 500+ daily alerts, reducing mean-time-to-triage by 40% and saving 10+ hrs/week of manual debugging. Strong problem-solving background with 1000+ DSA problems solved.

Education

- **Indian Institute of Information Technology, Lucknow** — Lucknow, Uttar Pradesh
  Bachelor of Technology in Computer Science & Engineering; ***CGPA: 8.80*** — *Jul 2023 – Present*
- **Relevant Coursework**: Data Structures & Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, Discrete Mathematics

Experience

- **Sprinklr** — Gurugram, Haryana
  Product Engineering Intern — *March 2026 – September 2026*
  - Built and deployed an AI-powered on-call agent integrating PagerDuty, Grafana, Kibana, and Graylog to process **500+ daily alerts**, reducing mean-time-to-triage by **40%** and saving **10+ hrs/week** of manual debugging.
  - Engineered end-to-end backend workflows for alert ingestion, investigation, tool execution, and structured Root Cause Analysis (RCA) generation, improving observability and operational reliability across internal microservices.
  - Designed and deployed **Model Context Protocol (MCP)** servers in Python to connect LLM-driven agents with internal APIs, enabling low-latency tool execution and automated operational workflows.

Projects

- **CrowdInfra** |
  Next.js, Node.js, Express.js, MongoDB, Google Gemini API, Google Maps API
  - Built a **community-driven infrastructure mapping platform** that enables users to pin and upvote local infrastructure needs, earning **Runner-up** out of 100+ teams at Hack-O-Fiesta 2025 during a 24-hour hackathon.
  - Integrated the **Google Gemini API** to analyze local market competition and generate data-driven profitability insights, with the **Google Maps API** for location-based demand mapping.
- **TravelPedia** |
  React.js, Spring Boot, MySQL, REST APIs, JWT Authentication
  - Designed and built a **full-stack travel planning application** using React.js, Spring Boot, and MySQL, enabling users to search destinations, hotels, flights, and activities through a unified platform.
  - Implemented **JWT-based authentication and role-based access control (RBAC)** to secure user access and application resources.

Technical Skills

- **Programming Languages**: C++, Java, Python, JavaScript, C, SQL
- **Core CS & Software Engineering**: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Debugging
- **AI & Agentic Systems**: LLM Integration, MCP (Model Context Protocol), Tool Calling, FastAPI, AI Agents
- **Backend & Distributed Systems**: Node.js, Express.js, Spring Boot, REST APIs, Microservices, MongoDB, MySQL
- **DevOps & Observability**: Docker, Git, GitHub, CI/CD, Grafana, Kibana, Graylog, PagerDuty
- **Frontend Technologies**: React.js, Next.js, Tailwind CSS, HTML/CSS

Achievements

- **Codeforces**: Ranked Expert with a maximum rating of **1722**.
- **LeetCode**: Ranked Knight with a rating of **1978**.
- **CodeChef**: Earned a 4-Star rating of **1888**.
- **Problem Solving**: Solved over **1000 DSA problems** across competitive programming platforms.
- **Hack-O-Fiesta 2025**: Secured runner-up position among **100+ teams** at IIIT Lucknow.

Leadership & Extracurricular

- **Coordinator, Utkrisht Fine Arts Society**: Managed end-to-end logistics, vendor relations, and on-site operations for cultural exhibitions attended by **500+ participants**.
